

Long throw optics (2.7 – 3.5: 1)

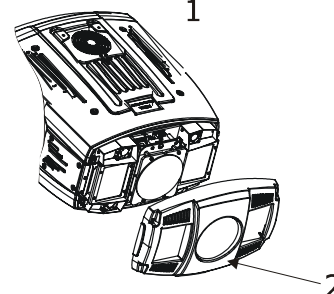

Short throw optics (1.2 – 1.7: 1)

Installation instructions

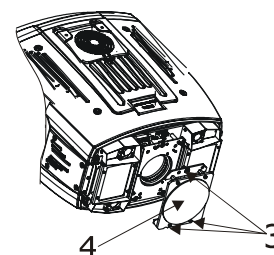

1. Disconnect the DigitalSpot 7000 DT from power.

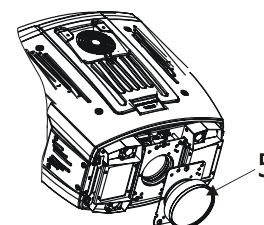

2. Remove the front cover of the fixture head (2) by loosening the 4 quarter-turn fasteners (1).

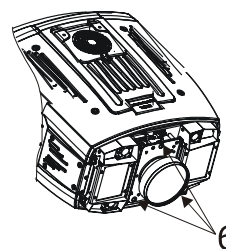

3. Remove the module of the glass cover (4) by loosening the 3 quarter-turn fasteners (3).

4. Place the long (short) throw optic module (5) instead of the module of the glass cover (4) and secure it by the 3 quarter-turn fasteners (6).

5. Fasten the plastic front cover back on the fixture head by means of the 4 quarter-turn fasteners.

6. Select the option **Long Throw Optics** (for the long throw optics with throw distance ration 2.7-3.5:1) or **Short Throw Optics** (for the short throw optics with throw distance ration 1.2-1.7:1) in the menu "Personality" ("Personality" → "Projection presetting" → "Throw Optics Mode").
